

HOW GREEN ARE YOUR GRANDCHILDREN?

Do your grandchildren know the ecology vocabulary?

Do they know what living GREEN is all about and WHY you have made a commitment to the environment?

Do they know what the local habitats are and what is being done to protect and preserve animal homes?

Do they know about endangered species and if there are problems in your area?

Do they know what ORGANIC means and why it is important?

Do your grandchildren understand natural products?

Can they list 5 facts about the world water problem and 5 things they can do to help? Do they use the refillable water bottles?

Do they understand the recycling rules in your area?

Do they recycle in their home?

Can they read the number codes on the bottom of plastic containers?

Do you take your grandchildren to the Farmer's market?

Do they know what the CSA signs on the grower's tables mean? Teach them about Community Supported Agriculture and supporting local farmers.

Do they have a garden? Plan to start planning for a garden together.

Check out the different types of container gardens and Square Foot Gardening.

Do they know which local businesses support caring for the environment?

Do they know about local and worldwide organizations that work to solve the problems that will make the planet a healthier place for people and animals?

Do they know that they can make be a part of GREEN activities...no matter how young or old they are? Everyone can make a GREEN difference.

Do they understand our slogan: The way that we live is the message we give

LIVE GREEN!
